

FOR IMMEDIATE RELEASE

FAST TURNAROUND ON REPLACEMENT CATALYSTS

PCA, Inc. announces that it can build and ship round NSCR catalysts in 48 hours or less! (often 24)

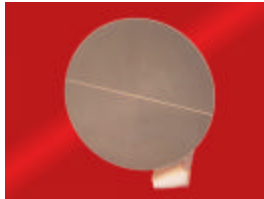

There is no need to depend on stocking locations that often are out of stock
There is no need to pay a premium

Improvements in manufacturing enable us to ship new 3-way catalysts in 48 hours or less

No premium is charged for this service. Prices tend to be 20% less than competitors

All 'BX10-90' sizes are available as well as special 'in-between' sizes.

Round CO (2-way) catalysts are also available in 48-72 hours ARO

ADCAT™ Catalysts are the strongest built catalysts available. We do not use precoated material that is subject to handling damage as well as thermal cycling effects.

- All stainless steel substrate construction
- Assembled and heat treated before coating – bonded construction!
- Precious metal delivery guaranteed by weight on every element
- Round units have a heavy duty outer stainless ring
- An anti telescoping bar is inset flush in each face

We have not had a warranty claim in over 10 years of production!

PCA also offers:

Special catalyst sizes and shapes for all natural gas engines.

Diesel oxidation catalysts

Turbine catalysts

Catalyst enclosures

Combination Silencers including the its unique “ladderless design”

Reclamation of precious metals from old or damaged elements – money back to you!

Visit the PCA website, www.pcaincorporated.com for more information and specifications.
